

ENVIRONMENTAL POLICY

Red Stag Timber Limited is committed to providing a high level of environmental performance and to do all that is reasonable and practicable to protect the environment.

Environmental management is an important part of company business and will be given equal status with other business objectives.

To achieve this we will:

- Operate our business so that we comply with all relevant environmental legislation, resource consents and relevant Codes of Practice.
- Provide training and documentation for all staff and contractors to ensure that they are aware of and follow procedures to ensure environmental objectives are met.
- Maintain and continually improve a certified ISO 14001 Environmental Management System to help ensure a high degree of environmental performance.
- Follow Best Management Practices where this is appropriate. In particular:
 - To identify, control and monitor environmental hazards
 - To avoid, reduce or control waste and pollutants
 - To manage the natural and physical resources under our control in a renewable manner and adopt practices which maximise the efficient use of energy.
- Strive for continual improvement in environmental performance by minimising any negative impacts on the environment. This will be achieved by way of:
 - Staff involvement/awareness and team work
 - Personal accountability
 - Prompt accident / incident reporting & investigation
 - Planning
 - Setting targets
- Report on our environmental performance and review objectives and targets on an annual basis.

Application of this policy and compliance with the company's environmental standards lies with all company staff, contractors and tenants at the Waipa site and areas of consented activity (i.e. ash landfill, springs, spray block).
